Single	\$0 – \$44,625	\$44,626 – \$492,300	\$492,301+

*Determine your capital gain bracket by adding your net long-term capital gains and/or qualified dividends to your other taxable income net of deductions.

For example, assume a joint filer has net taxable income of \$100,000 which includes \$20,000 in net long-term capital gain. The first \$9,250 of the gain falls within the 0% rate threshold of \$89,250 and will be taxed at 0%; while the remaining \$10,750 of long-term capital gain is above the \$89,250 threshold and will be taxed at 15%.

Short-term capital gain rate (one year or less)	Taxed at ordinary income tax rate.
Dividends	Qualified dividends are taxed at the long-term capital gain rates. Nonqualified dividends are taxed at ordinary income tax rates.

Higher rates apply to collectibles and unrecaptured §1250 gain. Consult your tax advisor about how they apply to your situation.

Netting capital gains and losses

1. Net short-term gains and short-term losses.
2. Net long-term gains and long-term losses.
3. Net short-term against long-term.
4. Deduct up to \$3,000 of excess losses against ordinary income per year.
5. Carry over any remaining losses to future tax years.
